

G.F.R.C. Pole Gun P/N 19-127

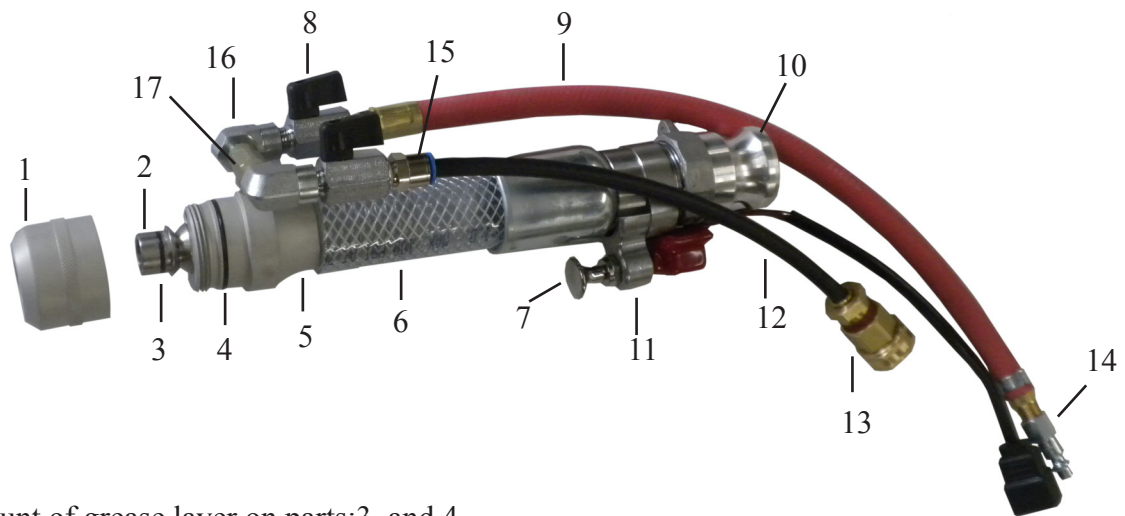

Warning:

Do not tight clear hose to the gun body with any kind of clamps at any time. This feature allows the gun to be disconnected in case of tip clogging to relief back pressure from material hose and pump hose.

Note:

Always turn air first and then turn material pump to alimanet material back flow into air holes.

Connect water hose to item 13 to rinse water trough tip 2 to clear air holes from material that been use.

Note:

Keep small amount of grease layer on parts:3, and 4 it will make part 1 tip holder install and remove easily.
